

## CS 201 – Encryption Chase

### Clue #1 A

The most classic of ciphers will aid you here  
as you search for exam points most dear  
First you need to find in Olsson Hall  
your Systems classmates' pictures upon a wall

My apologies to those I do not mention  
But the form of a number is my intention  
Draw from Cassidy to Hui to start the clue  
Clark to Saunders is the next you should do

Mr. Incerto completes this measure  
Now reveal the next step in your quest for treasure!

### Clue #2

The 80's are a time I hold most dear  
Turtles and Transformers I love, it is clear  
My sister, though, had a different creature  
Tenderheart being the primary feature

On the second floor of MEC you can see  
several planes of different pedigree  
One of these has a similar name  
to my sister's toys of fame

Using the man's name in the caption  
take the following action:  
Take the name as the "Frenchman's" key  
to decrypt the following for me:

SFCIP OX VAURW CSSDOINIFR WH CTLKGCLL

The answer of this poor rhyme  
should be placed here in due time:

**Clue #3**

We hold "Court" near Thornton Hall  
but no judges sit this bench  
Celebrations happen behind these walls  
But could used for anything in a pinch

Find the plaque upon the ground  
furthest from where I teach  
dedicating the pathway to all around  
so that his name is within reach

Take the two primes on this plaque  
and using a more modern cipher  
decrypt the following stack:  
(Is there anything that rhymes with "cipher"?)

2631556 85819 1912836 2720646 46944 3436883 136363 1613689 2879955

Answer 3:

--	--	--

**Clue #4**

You have gone through quite a bit  
as I have forced you to sit  
through story after story of random facts  
and lessons upon lessons of Java nicknacks

But something you might have gathered  
that there is something that I rathered  
to have had at my side  
to help the time abide.

Answer 4A:

--	--	--	--	--	--	--	--	--

Take the city of its beginnings  
to help you find your winnings  
And use that as the "keyword", if you will  
in this further test of your skill

UCHI PYB LO KNJUBOOJN PYSP VBHP PJ CHUCHCPX JH YCO IJJN CH JFOOJH

Answer 4B:
